## **Innovative Test Solutions Spreads Holiday Cheer to Schenectady Families in Need**

**Schenectady, N.Y.** – In an effort to ensure that no family misses out on the joys of the holiday season, Innovative Test Solutions has once again purchased and wrapped gifts for two adopted Schenectady families. This tight knit crew of test engineers knows that despite the challenges life presents, spreading holiday cheer to those in need is a formula that stands the test of time.

“This holiday tradition may be a small gesture, but it means so much to our company to be able to help our neighbors,” said Kevin McEvoy, ITS General Manager. “We know how important it is to have a family to rely on, and with people struggling this holiday season, being able to come together and lessen the stress for local families gives us a tremendous amount of joy. Our company has been a part of the Schenectady community since the company was founded in 2004 and giving back to an area that means so much to us is something we always look forward to doing.”

Jason Ramundo, a mechanical test technician at ITS, spearheaded the effort, working with a social worker at the Schenectady City School District to identify two families in need of assistance this holiday season. Every employee at ITS pitched in, buying and wrapping gifts that will be delivered to the families next week.
